

**Marysville Borough Sewer & Sanitation Committee**  
**November 7, 2012**  
**8:00 AM**  
**AGENDA**

**Chair: Steve Copp    Members: Ann Simonetti, Roger Barrick,**

**Operators: Lonnie Sarver, Darrel Binkley**

Lonnie handed out a list of all maintenance work completed to date this year. Scott will make a copy for all council persons.

**1. Sewer Separation Project Update**

Scott gave an over view of what's going on in the project. The water company is really holding the project up. We had planned to be in the square this week but the work is not complete by the water main and pump so now that crew has moved to the back yards of Valley Street for the sanitary sewer and then the replacement of the storm culvert.

**2. 300 Block Kings Highway Pipe Damaged**

Scott reported that the bid was advertised on 11/5 and will be again on 11/12.

**3. Growing Greener Grant Application (Ann)**

The grant has been completed by Ann and sent in on time.

**4. Status of Occupancy/Vacancy Report – Clarification under ordinance No. 311/ 2<sup>nd</sup> paragraph**

After some discussion, Ann asked Connie to see what Dan Altland's comments were and for him to give us direction. Scott will report on this at the council meeting.

**5. Communitor Replacement**

Lonnie and Scott are to visit Silver Spring Treatment plant and get their input on how their communitor has been working out. Let more information on the maintenance and durability. Lonnie also said about visiting North Middleton plant as well. Ann mentioned we could do this in one day if planned properly. The visiting could happen prior to the council meeting so Scott will report at the council meeting. Ann ask Scott to have Kim invoice Wexcon for the damages.

**Next Meeting Wednesday, December 5, 2012 @ 8:00 AM**
