

Marysville Borough Sewer & Sanitation Committee
December 8th, 2011
8:00 AM
Minutes

Chair: Roger Barrick

Members: Ann Simonetti, Stephen Copp

Operators: Lonnie Sarver, Darrel Binkley

1. List of Sewer Plant issues

Scott reported on all issues below and that everything is in line and moving forward. We are making great strides to bring the plant up to speed.

- | | |
|--------------------------|----------------------|
| • Head works | Working on this now |
| • Tideflex Valves | Received River Level |
| • #1 lift station | Reline pipe |
| • Distribution Box | |
| • Mud Valve | |
| • Exhaust Manifold Leaks | |

2. #1 Lift Station Reline Pipe

Scott reported that Lonnie and himself went to see the line repair work on 11-16-11 and that the people that were hosting this were not big enough to do out system, but enforced that our low bidder was the best in the area.

After much discussion about possibly doing all three section versus just one and if the other two sections that Scott has not reviewed yet were are bad as the one that was viewed. Scott said he and Lonnie would try and watch the video's and report at the council meeting Monday night.

3. The lower interceptor will need cleaned as soon as it dry's out.
(info only)

4. Grinder Pump

(Quoting now) Still getting some numbers together, did not really look at this last month.

5. **Contract Services for Main Pumps**

Scott received the third quote and Scott will now put together a spread sheet on the quotes for next months committee meeting.

6. **Sewer Rate Change**

(Pennvest Letter Dated 11/02/11)

Scott is waiting for council to make the decision on sewer rates so he can address this letter from Pennvest.

7. **Setting up a meeting for plumbing for a drop zone.**

Scott reported he is setting up a meeting with a vendor and will have Lonnie and Darrell included to possibly have a drop line installed to possibly contract sewer tank haulers to use our sewer plant and for us to make some money .

Next Meeting Thursday, January 5th, 2011 @ 8:00 am
