

Marysville Borough Sewer & Sanitation Committee
June 1, 2015
5:45 PM
Minutes

Chair: Steve Copp Members: Allen Metzger, Larry Little

Operators: Lonnie Sarver, Darrel Binkley

1. Water Consumption Billing

Scott reported that Connie is still looking into this and what she is coming up with by running many numbers is that we may not be able to achieve the amount of funds need to change to consumption billing. Larry asked if he could help by taking a look at it. The committee agreed to let Larry work with Connie for a possible fix.

2. RFP Trash Contract

The committee approved to place this line item on the council agenda.

3. Looking at a way to clean out one of the SBR's

The committee agreed that we should do what we need to do to run the plant at it best.

Info only: The guys have replaced the valve from sludge tank #2 and it is working well. We just had the yearly DEP inspection with nothing major being found. One small issue with the temperature in the sampling refrigerator, corrective action is being taken. We should receive the inspection results in a few weeks. We had to call in an electrician last week due to an issue with an air reactor switch, problem taken care of for now.

Next Meeting Monday August 3, 2015
