

**Marysville Borough Sewer & Sanitation Committee**  
**June 9th, 2011**  
**8:00 AM**  
**MINUTES**

**Chair: Roger Barrick**

**Members: Ann Simonetti, Marcus Hite**

**1. Jason Wert**

**Mercuria Energy**

Jason introduced himself and gave the committee his history of how he got to Mercuria Energy. Jason schooled the committee on what the Nutrient Credit system was all about and what they could do for Marysville. Our sewer plant has extra credits that it can sell and Jason's company would buy and sell our credits for a 50/50 split of sold price. The credits are only good for one year and then have to be repurchased. This could be at least a twenty year program. With our sewer project in the borough we would even have more credits available. Price now per credit is going for \$3's but Jason believes in the near future that the prices will be \$10 to \$20 a credit. There company pay's for all research and pay's our engineer costs.

**2. List of Sewer Plant issues**

- |                          |                                    |
|--------------------------|------------------------------------|
| • Head works             | A & E Associates                   |
| • Tideflex Valves        | \$10,000.00 each plus installation |
| • #1 lift station        | Looking at slip lining main        |
| • Distribution Box       | Being worked on now                |
| • Chemical Tanks         | Removing two                       |
| • Mud Valve              |                                    |
| • Exhaust Manifold Leaks |                                    |

Head Works cost sheet and quote. (Stone Gate Concepts)

Getting two more phone quotes and in writing if possible.

**3. The lower interceptor will need cleaned this summer.**

( getting cost estimates)

**4. John Edkin – Inquiring to use a different trash hauler other than Interstate Waste**

The committee agreed that the borough has already given permission to others in the borough to use other waste hauler's and granted John the same right as others.

5. **Watch video of sewer main Marysville motors to pump station.**  
(awaiting quotes for lining the main)
6. **Received the Grant Agreement for H2O Project (need to sign and return)**  
Scott is to move forward with a meeting with DEP and after the meeting we will know what direction we have to move forward in.

**Next Meeting Thursday, July 7th, 2011 @ 8:00 am**
