

Marysville Borough Sewer & Sanitation Committee
September 4, 2013
7:00 AM
Minutes

Chair: Steve Copp Members: Ann Simonetti, Roger Barrick,
In attendance: Ann, Roger, Scott and Dave Magee, in audience.

Operators: Lonnie Sarver, Darrel Binkley

Lonnie reported that they used the milling to establish a smoother right of way to the interceptor. He also told the committee about the Air Release Valve and asked that we get a new one now and have the old one rebuilt so we have a spare. He also would like to have this placed on as a budgetary item to replace one a year since they are all fifteen years old. This item is listed as #4 below.

1. Sewer Separation Project Update (Finishing Paving Today)

Scott reported that the paving was finishing up as the meeting was taking place. One issue came up with a water main break less than ten hours after the new paving was complete on Cameron Street. United Water will repave that entire area. Dave Magee asked what the borough was going to do about the damaged curbs and sidewalks. After much discussion on where and how bad the damage is, the committee asked Scott to have the engineers including the inspector on duty at the work session prior to the council meeting. Dave verbally gave a list of areas that need addressed before the project can be called complete. Scott has a list to be completed already and will add what he does not already have. Scott said we will not pay Wexcon until the repairs have been made.

2. Kings Highway Project (September 9th week)

Scott reported that the work will start on Monday, September 9th on Kings Highway. Scott will notify the school about the construction and the days of anticipated road closure(s). Roger asked for the information on the wiring so he can have the wiring completed for the hook up.

3. Asset Management

After much discussion the committee asked Scott to call Tim for what the project would cost after the first year. Scott will have this information for the council meeting. The committee approved to keep this item on the council agenda. Ann will check if LTAP has a worksheet similar to the Sign Inventory Management System. Ann reminded Scott that the SIMS must be completed by June of 2014.

4. ARV Pumps (\$672.00)

The committee recommended this item for the Borough Council agenda.

5. CDBG grant update

Scott met with SEDA-COG. All matters are being handled directly between SEDA-COG and Dan Altland.

Next Meeting Wednesday, October 9th, 2013 @ 7:00 AM
