

Marysville Borough Streets Committee
October 5, 2015
5:00PM
Minutes

Chair: Allen Metzger Members: Dave Magee, Lance Barthel

Maintenance Men: Robert Laman, Ken Miller

1. Long Term Planning for Paving Streets

The committee had a very long discussion about the financing of the paving projects and the sewer separation project that is forth coming. Scott reported that he has already scheduled a meeting with our finance advisor Ryan Hottenstein on October 28th at 10:00 AM to discuss our best avenue of financing these projects. The committee believes the time is right for the project with the lower of oil prices that all the materials are oil based, it should drive the cost of the projects down.

2. Paving

Scott reported that the state extended the paving time frame until the end of October. So our paving was pushed back a week. The time frame for our paving is the third week of October.

3. Kubota RTV X-series

After much discussion the committee approved to place this line item on the finance committee agenda.

4. Rock Slope Improvement Project

Scott printed off a letter from Penn-DOT for the committee that state there is going to be a meeting at the Marysville Fire Hall on October 7th starting at 1:00 PM. The entire committee is going to attend the scheduled meeting.

5. Speed Bumps

The committee asked Scott if he had ordered the speed bumps and he has. Scott reported they should be here within the next three weeks. The committee will seek council's approval to trial them on South Main Street prior to this winter.

Next Meeting Monday, November 2, 2015
