

Marysville Borough Streets Committee
April 6, 2015
5:00PM
Minutes

Chair: Allen Metzger Members: Dave Magee, Lance Barthel

1. Street Sweeper Repair

After much discussion of the cost of the repair and the age of the sweeper, the committee agreed to place this line item on the council agenda for approval.

2. Cameron Street One-Way from Broad to 11&15

The committee discussed different ways to make this work, mostly with safety in mind. After much discussion the committee agreed to table this to the next meeting.

3. One Way Arrows at Intersection (committee road trip)

The committee agreed to give this a try. With all the signs not working they are up to trying something to try to get people from driving the wrong way on one way streets.

4. Salt Storage Area

Scott reported that we did receive 100 tons of salt and that with the right equipment the storage area could handle another 100 tons. Scott will ask East Pennsboro Twp. to come up and push the salt up to make room for more in the fall.

5. Park Drive and Ridgeview Drive Rebuild

The committee wants to put a five to ten year plan together to repair or replace the infrastructure of these two streets. They would like to start by having our engineers do a study to see what the roads are going to need and to have a plan that is shovel ready.

6. Sink Hole Kings Highway

The committee took a field trip out to inspect the sink hole off of Kings Highway on a personal driveway. The committee instructed Scott to have our engineer look at the sink hole to help determine how the sink hole appeared. Scott will contact the home owner after the engineers visit.

Next Meeting Monday, May 4, 2015
