

Marysville Borough Sewer & Sanitation Committee
July 5, 2016
5:45 PM
Minutes

Chair: Steve Copp Members: Allen Metzger, Larry Little

Operators: Lonnie Sarver

1. Replacement of Personnel

After much discussion the committee is leaning towards a non-experienced maintenance person that can be formed to our plant and then given a time frame to get there sewer plant licenses. This line item will go to the personal committee for consideration.

2. Sale of Sewer Plant

(Suez, PA American Water, Public Financial Management)

The committee approved to move forward with Public Financial Management for the RFP for the sale of the plant at a cost of \$2,000. This line item will go to the finance committee and then to the council agenda.

3. Sewer Separation Project

Scott gave a short history of what we believe is going on to back up the system on the storm water side of things. The committee discussed that we need to get this project completed sooner than the 2021 dead line. The committee would like to complete this project in the year 2018 if at all possible.

4. Outfall #3 Storm Water

Again, Scott gave a short history of what is going on with this system. Because the water cannot go directly or straight out to the river due to the concrete box system that it has to go through. Scott explained that there is a duck bill for better words still in the pipe and that restrict the flow of storm water, thus backs up enough pressure to life the manhole lids off. Scott and Lonnie are coming up with a fix and will report back at a later date.

Next Meeting Monday, August 1, 2016
