

Marysville Borough Sewer & Sanitation Committee
September 6, 2016
5:45 PM
Minutes

Chair: Steve Copp Members: Allen Metzger, Larry Little

Operators: Lonnie Sarver

1. Refuse Contract

The committee discussed the borough's option for billing dumpsters/residential properties. Lance Barthel stated he liked the fact if there was a problem with the dumpster he would call Connie. Connie would contact Advanced Disposal Services and the problem was solved. Advanced Disposal Services could bill the dumpster customers directly and the borough could continue to bill residential properties. Nothing would change as far as the contract.

Ron Carlson explained the Borough of Marysville currently has a blended Residential rate or Residential/Commercial Franchise with Advanced Disposal Services. Ron Carlson explained we could do addendum to the refuse/recycle contract instead of rebidding contract to not bill vacant properties, have Advance Disposal Services bill dumpster customers and the borough to continue to bill residential.

Connie mentioned there was a correction for Cove Mountain on the size of their dumpster. Cove Mountain have a four yard dumpster not a six yard dumpster.

Lance Barthel also questioned about recycle bins for businesses. Connie mentioned Speedway and the Marysville Diner have another dumpster for recycling. Lance said he did not have room for additional dumpster. Lance Barthel will contact Advanced Disposal Services to see what he can do since the borough is able to receive money for recycling through the recycling grant.

Committee stated to send a letter out to the commercial properties that have dumpsters to let them know starting in January 2016 they will be billed directly from Advanced Disposal Services for the dumpsters.

Scott will have our Solicitor, Dan Altland look over the addendum to the contract.

**2. Sale of Sewer Plant
(Suez, PA American Water, Public Financial Management)**

Scott indicated he took the insurance companies assessment for replacement cost of equipment. The Public Financial Management stated they usually get the cost of equipment from the engineer.

Committee said not to use engineer for value of sewer equipment.

3. Sewer Separation Project - Tabled

Next Meeting Monday, October 3, 2016
